FIGHTING PESTS IN GARDENS

Larger Squash Bugs Found Harder to Control Than Other Insects—Treatment Differs.

All of us are bothered more or less, with injurious insect pests in the garden, and with dealing with them the first thing to be determined is whether they are chewing or sucking insects, whether they eat the leaf or extract its sap. There must be entirely different treatment employed in the two cases.

The chewing insects are comparatively easy to get rid of, unless they are working on the foliage, which will be injured by the application of a poison strong enough to kill the insects.

The sucking insects insert their bills through the skin of the leaf or stem that they are feeding on, so as to extract the juice, therefore no matter how much poison is applied to the surface, the insects get none of it.

For the striped beetle, which is destructive to squash, cucumber and melon vines, a slight application of lime, tobacco dust, plaster, or ashes, will be found a good preventive, and will also drive away those which may have already appeared. Sometimes, however, the ashes will burn the foliage if rain falls soon after they are applied, so on the whole, lime, and plaster, or tobacco dust are better for the purpose, says a writer in the Farm Progress. Some keep a healthy bunch of onions growing in each hill, bruising the leaves occasionally, so as to hide the smell of the vines from the beetles.

The larger squash bugs have been the most troublesome and the hardest to deal with in our garden. They are sap suckers, and there is nothing

A Squash Bug.

we have found that will kill them which would not at the same time be injurious to the plants, so hand picking seems the only remedy. It makes quite a difference in the amount of work done whether hand picking is commenced early in the season or not until the new crop of bugs appear.

Imported Potatoes.

The secretary of agriculture warns American farmers against using imported potatoes for home production. Europe has several potato diseases not known to this country, and there is danger of introducing these diseases if the imported product is used for seed. The foreign-grown are all right for table use, but for cultivation they carry no little risk.

Bees and Farm Notes

The humus content of the soil is important in the orchard.

To keep lawns in good condition, practice weekly mowing.

Thousands of bushels of grain are spoiled every year by poor stacking.

Alfalfa is ready to cut when the crowns begin to send up new shoots.

Train up the tomato plants, it will give them size and they will bear better.

Don't forget to take water to the field for the horses during these hot days.

It is a well known fact that alfalfa does not do well upon an impervious subsoil.

The growth and feeding value of the soy bean is quite like that of the cowpea.

"Too little phosphorus" is the cause of many of the low yields on corn belt soils.

There seems to be a good deal of prejudice against millet because it exhausts the soil.

The yellow condition of the alfalfa indicates that it has not received sufficient nitrogen.

Sand and hairy vetch compare very favorably with alfalfa and clover hay as a feed for milk cows.

It is estimated that ten years of single cropping will wear out any but the very richest of soil.

Use the hoe in the garden a little every day. It will give good returns for all the time you put in that way.

Baling corn fodder is a new idea, but if it works out well it will save a good deal of hard and disagreeable work.

It is always a good plan to use plenty of seed in planting cucumbers, cantaloupes, melons, etc. The hills may be thinned out later.

Oats and peas should be cut for hay when the oats are in the milk stage and the advance pea pods contain reasonably good sized peas.

Blamed a Good Worker.

"I blamed my heart for severe distress in my left side for two years," writes W. Evans, Danville, Va., "but now I know it was indigestion as Dr. King's New Life Pills completely cured me." Best for stomach, liver and kidney troubles, constipation, headache or debility. 25c. at Oberdorfer's.

The Writer Who Does Most.

That writer does the most who gives his reader the most knowledge and takes from him the least time.—C. C. Colton.

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gebhardt, Oriole, Pa. For sale by all dealers.

The Latest Thing in Stoves

For a midnight supper, as for any other meal at any other time, the very latest thing in stoves—the best that stove-artists can do—is a

New Perfection Oil Cook-stove

It Burns Oil—No Ashes
It Concentrates Heat—No Waste
It is Handy—No Dirt
It is Ready—No Delay

It concentrates the heat when you want it and where you want it. It is as quick as gas, steadier and handier than coal, cheaper than electricity.
(The New Perfection Stove has long, enameled, turquoise-blue chimneys. It is handsomely finished in nickel, with cabinet top, drop shelves, towel racks, etc. Made with 1, 2 or 3 burners.)
All dealers carry the New Perfection Stove. Free Cook-Book with every stove. Cook-Book also given to anyone sending 3 cents to cover mailing cost.

You Want the Best—Not the Cheapest

Flanders "20" Roadster, \$750

Don't be alarmed if somebody tells you you can buy an automobile for less money than the \$750 Studebaker-Flanders "20." You can, but you better not. The Flanders "20" corresponds point by point with the best and highest priced cars sold. Cheaper cars at every vital point are built on ideas long ago discarded for good cars. Don't take our word for it. Make comparisons and see.

The Studebaker-Flanders "20" is a marvel—a high grade modern car at a low price. If you pay less you buy much less. And the cheaper car today will cost you far more in the long run. The competing car isn't sold which the Studebaker Corporation, the greatest automobile manufacturers in the world, couldn't reproduce for less money; but we won't build a cheap car, because the name "Studebaker" means the best for your money.

If you are content with a car that runs today and dies tomorrow, don't buy the \$750 Flanders "20." It will wear for years. Remember this—the Studebaker-Flanders "20" will outwear 2 to 1 any other car under \$1100 and give you double satisfaction, confidence and comfort into the bargain.

We can prove it—Send for new catalogue
